The Cover

You may have had to look twice to make sure this was your specialty journal—because the cover has a whole new and different look to it. We redesigned it after taking a long, hard look at our traditional covers with their contents' listings and deciding that a more contemporary appearance was in order. The result: a new, fresh look that incorporates a modern, modular graphic design. In addition, the modular design permits us to highlight the articles of major importance to you in each issue. The complete contents will continue to appear within the first few pages of the issue. We hope you like our new cover design.
