

**EDITORIALS**

<b>Power and Prejudice</b> .....	13
Richard Warren, MD, Boston	
<b>A New Year and a New Look</b> .....	14
Arthur E. Baue, MD, New Haven, Conn	

**LIPID-ATHEROSCLEROSIS SYMPOSIUM**

<b>Overview and Dedication</b> .....	18
Henry Buchwald, MD, PhD, Minneapolis	
<b>Dietary and Serum Lipids in the Multifactorial Etiology of Atherosclerosis</b> .....	21
Jeremiah Stamler, MD, Chicago Dietary fat content, serum cholesterol and the incidence of atherosclerosis are clearly correlated.	
<b>The Lipid Hypothesis: Pathophysiological Basis</b> .....	28
Jean Davignon, MD, MSc, FRCP(C), Montreal The ecological and genetic environment, arterial wall and circulating blood factors influence atheromatous plaque formation.	
<b>The Lipid Hypothesis: Genetic Basis</b> .....	35
Charles J. Glueck, MD, Peter O. Kwiterovich, Jr, MD, Baltimore, Md Hyperlipidemia, particularly genetically determined, facilitates the development of atherosclerosis.	
<b>New Insights Into Cholesterol Dynamics</b> .....	45
Tatu A. Miettinen, MD, Helsinki Overproduction of cholesterol and bile acid and cholesterol malabsorption are related to clinical problems.	
<b>Food Products and Hyperlipidemia</b> .....	52
David Kritchevsky, PhD, Philadelphia Dietary contribution to total plasma cholesterol level is a sum of everything in the diet, not just the lipid component.	
<b>Management of Hyperlipidemia: Diet and Drugs</b> .....	55
Daniel Steinberg, MD, Scott M. Grundy, MD, La Jolla, Calif A simplified schema for diagnosis and classification of the hyperlipidemias and specific guidelines for diet and drug treatment.	
<b>Ileal Bypass in the Control of Hyperlipidemia and Atherosclerosis</b> .....	62
H. William Scott, Jr, MD, Nashville, Tenn Ileal bypass is the most effective method available today for lipid reduction.	
<b>Portacaval Shunt and Hyperlipidemia</b> .....	71
Thomas E. Starzl, MD, PhD; Charles W. Putnam, MD; Lawrence J. Koep, MD, Denver A portacaval shunt for hyperlipidemia may be indicated for the individual with type II disease.	
<b>Determinants of Atherosclerosis Progression and Regression</b> .....	75
Samuel H. Brooks, ScD; Dennis H. Le Croisette, PhD; David H. Blankenhorn, MD, Los Angeles Noninvasive methods of measuring small changes in arterial lesions are required to evaluate various risk factors and treatment programs.	
<b>Testing the Lipid Hypothesis: Clinical Trials</b> .....	80
Basil M. Rifkind, MD, FRCP, Robert I. Levy, MD, Bethesda, Md A well-conducted clinical trial is required to test the lipid hypothesis.	

THE ARCHIVES OF SURGERY is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

## CONTENTS—Continued

### ORIGINAL ARTICLES

<b>Colorectal Complications of Renal Allograft Transplantation</b> .....	84
Olaseinde I. Sawyerr, MD; Paul J. Garvin, MD; John E. Codd, MD; Ralph J. Graff, MD; William T. Newton, MD; Vallee L. Willman, MD, St Louis The complications of colorectal disease in immunosuppressed patients are so serious that the colon should be evaluated in all patients over 40 years of age before transplantation.	
<b>Effect of Vagal Stimulation on the Concentration of Gastrin in Serum and Antral Mucosa in Dogs</b> .....	87
Takaho Watayou, MD; N. Ian Ramus, FRCS; James C. Thompson, MD, Galveston, Tex Vagal release of gastrin may trigger its rapid synthesis.	
<b>Listeria Infection in Transplant Patients: Five Cases and a Review of the Literature</b> .....	90
Nancy L. Ascher, MD; Richard L. Simmons, MD; Stephen Marker, MD; John S. Najarian, MD, Minneapolis This unusual infectious agent appeared to produce mild infection in these patients but it may herald more serious infections in the immunosuppressed patient.	
<b>Reactive Hyperemia vs Treadmill Exercise Testing in Arterial Disease</b> .....	95
Brian W. Hummel, MD; Brad A. Hummel; Alan Mowbry, MD; William Maixner; Robert W. Barnes, MD, Iowa City Ankle pressure measurement during reactive hyperemia is a useful substitute for treadmill testing in evaluating patients with arterial occlusive disease.	
<b>Hereditary Neonatal Hyperparathyroidism</b> .....	100
Norman W. Thompson, MD, Ann Arbor, Mich; Luther C. Carpenter, MD; Dale L. Kessler, MD, Grand Rapids, Mich; Ronald H. Nishiyama, MD, Ann Arbor, Mich A cause of "failure to thrive" in the neonate, which is fatal if untreated.
