OF THE WESTERN SURGICAL ASSOCIATION,
LAS VEGAS, NOV 13-16, 1977**

By Precept and Example	359
Allen M. Boyden, MD, Portland, Ore	
Carcinoma of the Breast: A Clinical Study	364
Alfred C. Meyer, MD; Simmons S. Smith, MD; Meredith Potter, MA, SpA, Rockford, Ill Simple, modified radical, or radical mastectomies provided no significant differences in results.	
Management of Occult Medullary Thyroid Carcinoma: Evidenced Only by Serum Calcitonin Level Elevations After Apparently Adequate Neck Operations	368
Melvin A. Block, MD; Charles E. Jackson, MD, Detroit; Armen H. Tashjian, Jr, MD, Boston Elevated serum calcitonin levels may persist with no evidence of metastasis or other lesions.	
Management of Severe Hypercalcemia Caused by Primary Hyperparathyroidism	373
Vanessa G. Schweitzer, MD; Norman W. Thompson, MD; Jay K. Harness, MD; Ronald H. Nishiyama, MD, Ann Arbor, Mich Reduction of serum calcium level and prompt parathyroidectomy is effective in most cases.	
Primary Hyperparathyroidism and Peptic Ulcer Disease	384
Dimitrios A. Linos, MD; Jonathan A. van Heerden, MB, FRCS (C); Charles F. Abboud, MD; Anthony J. Edis, MD, Rochester, Minn Ulcer symptoms improved in 58% of patients after parathyroidectomy.	
Pulmonary Effects of Albumin Resuscitation for Severe Hypovolemic Shock	387
Donald W. Weaver, MD; Anna M. Ledgerwood, MD; Charles E. Lucas, MD; Roger Higgins, PhD; David L. Bouwman, MD; Stemple D. Johnson, MD, Detroit Albumin appeared to have a detrimental effect on respiratory function in injured patients.	
'Lethal' Burns: A Progress Report	397
William W. Monafo, MD; Howard N. Robinson, MD; Toshiharu Yoshioka, MD; Vatché H. Ayvazian, MD, St Louis Early deaths due to inhalation injury are an unsolved problem.	
Wound Excision to Fascia in Burn Patients	403
Barry A. Levine, MD; Kenneth R. Sirinek, MD, PhD; Basil A. Pruitt, Jr, MD, Fort Sam Houston, Tex Survival was not improved by using burn wound excision.	
Intraoperative Localization of Intestinal Arteriovenous Malformation	410
William E. Evans, MD; Thomas M. O'Dorisio, MD; William Molnar, MD; Edward W. Martin, Jr, MD; Charles F. Wooley, MD; Marc Cooperman, MD, Columbus, Ohio A large mesenteric vein with a higher pressure and PO ₂ provides the clue.	
Traumatic Injuries of the Inferior Vena Cava	413
Joseph M. Graham, MD; Kenneth L. Mattox, MD; Arthur C. Beall, Jr, MD; Michael E. DeBakey, MD, Houston Over the last 20 years mortality has been reduced from 100% to 30% by effective resuscitation and vascular control.	

THE ARCHIVES OF SURGERY is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

CONTENTS—Continued

Chronic Upper Extremity Arterial Insufficiency: Etiology, Manifestations, and Operative Management	419
William S. Gross, MD; D. Preston Flanigan, MD; Richard O. Kraft, MD; James C. Stanley, MD, Ann Arbor, Mich Assessment of arterial reconstruction for isolated symptomatic arm ischemia in 43 patients.	
The Validity of Normal Arteriography in Penetrating Trauma	424
William H. Snyder III, MD; Erwin R. Thal, MD; Robert A. Bridges, MD, Dallas; A. James Gerlock, MD, Nashville, Tenn; Malcolm O. Perry, MD, Seattle; William J. Fry, MD, Dallas Careful interpretation of arteriography can reduce the number of negative vessel explorations.	
Deep Venous Thrombosis and Postsplenectomy Thrombocytosis	429
William W. Coon, MD; John Penner, MD; G. Patrick Clagett, MD; Nancy Eos, Ann Arbor, Mich No need for <i>routine</i> antithrombotic therapy in patients with elevated platelet counts after splenectomy.	
Therapeutic Angiography: Its Value to the Surgical Patient	432
Joseph F. Walter, MD, Palo Alto, Calif; Joseph J. Bookstein, MD, San Diego; Richard A. Kramer, MD; Walter B. Cannon, MD; Michael L. Trollope, MD; Robert W. Jamplis, MD, Palo Alto, Calif The use of angiographic procedures to treat a variety of problems is reviewed.	
Early Decortication After Thoracic Trauma	440
Michael P. Collins, MD; Jerry M. Shuck, MD, DSc; Thomas L. Wachtel, MD; Jerold Brenowitz, MD, Albuquerque, NM Decortication within ten days of injury provided rapid recovery and low morbidity.	
Radiotherapy Combined With Curative Surgery: Its Use as Therapy for Carcinoma of the Sigmoid Colon and Rectum	446
Marvin M. Romsdahl, MD, PhD, H. Rodney Withers, MD, PhD, Houston Appears promising in reducing local recurrences.	
A Critical Evaluation of the Duhamel Operation for Hirschsprung's Disease	454
Jay L. Grosfeld, MD; Thomas V. N. Ballantine, MD; John F. Csicsko, MD, Indianapolis The modified Duhamel pull-through provided the best results.	
Pseudolymphoma in Renal Allograft Recipients	461
W. Peter Geis, MD; Shunzaburo Iwatsuki, MD; Z. Molnar, MD, PhD; Joseph L. Giacchino, MD; Ronald H. Kerman, PhD; Todd S. Ing, MD; Jessie E. Hano, MD, Maywood, Ill Benign course for a histologically malignant process suggests lymphoblastic rebound to antithymocyte globulin.	
Intra-abdominal Infection and Acute Renal Failure	467
Samuel L. Milligan, MD; Friedrich C. Luft, MD; Stephen D. McMurray, MD; Stuart A. Kleit, MD, Indianapolis Mortality decreased by reoperation for correctable problems and total parenteral nutrition.	
Malignant Histiocytomas	473
Lawrence B. Langsam, MD; Gerald Fine, MD; Joseph L. Ponka, MD, Detroit The malignant biologic behavior of the histiocytomas is emphasized.	
Use of Synthetic Absorbable Sutures for Abdominal and Chest Wound Closure: Experience With 650 Consecutive Cases	477
Dwight H. Murray, Jr, MD, F. William Blaisdell, MD, San Francisco Excellent results in closing incisions with running sutures of synthetic collagen material.	
Endoscopic Electrocoagulation: An Alternative to Operative Therapy in Bleeding Peptic Ulcer Disease	483
Nicholas A. Volpicelli, MD; Jack D. McCarthy, MD; John D. Bartlett, MD; William E. Badger, MD, Albuquerque, NM A useful technique in high risk patients where the bleeding site can be visualized.	

Continued on p 350.

CONTENTS—Continued

Proximal Hepatic Duct Reconstruction: Repair Using Sutureless Mucosal Graft Hepaticojejunostomy	490
Mike Daugherty, MD; Calvin B. Ernst, MD; Charles R. Sachatello, MD; Ward O. Griffen, Jr, MD, Lexington, Ky Jejunum mucosa tied to a catheter is pulled up into the hepatic duct to form the sutureless anastomosis.	
Inframesocolic Transduodenal Approach to the Distal Biliary-Pancreatic Ductal System	496
Mario R. Villalba, MD, Robert J. Lucas, MD, Royal Oak, Mich A useful technique in patients when multiple previous procedures have been performed.	
Evaluation of Ultrasound in the Diagnosis of Acute and Chronic Biliary Tract Disease	500
Erwin R. Thal, MD; John Weigelt, MD; Michael Landay, MD; Melvyn Conrad, MD, Dallas The high degree of accuracy of sonography for detection of gallstones is confirmed.	
Hepatic Dysfunction During Hyperalimentation	504
George F. Sheldon, MD; Scott R. Petersen, MD; Richard Sanders, MD, San Francisco This form of intrahepatic cholestasis will respond to decreasing the dextrose concentration or giving amino acids alone.	
Continuing Experience With Palliative Chemical Splanchnicectomy	509
D. Preston Flanigan, MD, Richard O. Kraft, MD, Ann Arbor, Mich Phenol splanchnicectomy provides effective control of pain in advanced abdominal neoplasms.	
Pancreatic Cystadenoma: A Clinicopathologic Study of 45 Cases	512
Darryl J. Hodgkinson, MD; William H. ReMine, MD; Louis H. Weiland, MD, Rochester, Minn Total excision is recommended unless the relation of the tumor to the mesenteric artery precludes removal.	
Pancreaticojejunostomy for Chronic Pancreatitis: Two- to 21-Year Follow-up	520
Richard A. Prinz, MD; Bruce H. Kaufman, MD; Frank A. Folk, MD; Herbert B. Greenlee, MD, Maywood, Ill Effective relief of pain in chronic relapsing pancreatitis.
