

EDITORIAL

- Surgical Residencies and Collective Bargaining** 677
Paul A. Ebert, MD, San Francisco

A PANEL BY CORRESPONDENCE

- The Emergency Department Physician and University Teaching Hospitals** 678
George Johnson, Jr, MD (Guest Editor), Chapel Hill, NC; Ronald L. Krome, MD, Detroit;
Joseph A. Moylan, MD, Durham, NC; David K. Wagner, MD, Philadelphia
Editorial comment by Ben Eiseman, MD, Denver

ORIGINAL ARTICLES

- Clinical Renal Preservation by Cryoperfusion With an Albumin Perfusate: Renal Perfusion With Albumin** 688
Richard L. Bursleson, MD; David B. Jones, MD; Agheg M. Yenikomshian, MD, New York;
Claude Cornwall, MD, Syracuse, NY; Christine DeVoe, RN; Jeanne DeRito, RN, New York
Reliable preservation for up to 50 hours was provided with albumin.
Editorial comment by Martin Schiff, Jr, MD, New Haven, Conn
- Venous Access Using the Bovine Carotid Heterograft: Techniques, Results, and Complications in 75 Patients** 696
Norman R. Hertzner, MD, Edwin G. Beven, MD, Cleveland
Bovine heterografts are useful when direct A-V fistula construction is not possible.
- Complex Cerebral Revascularization** 706
Lt Col George J. Collins, Jr, MC, USA; Col Norman M. Rich, MC, USA;
Lt Col Charles A. Andersen, MC, USA; Lt Col Paul T. McDonald, MC, USA, Washington, DC
Multiple lesions require an individualized approach particularly when the innominate and subclavian orifices are involved.
- Postsplenectomy Thrombocytosis: Its Association With Mesenteric, Portal, and/or Renal Vein Thrombosis in Patients With Myeloproliferative Disorders** 713
David H. Gordon, MD; Donald Schaffner, MD; John M. Bennett, MD;
Seymour I. Schwartz, MD, Rochester, NY
Aspirin and low dose heparin were used to try to avoid these complications.
Editorial comment by Edwin W. Salzman, MD, Boston
- Rupture of the Spleen in Infectious Mononucleosis: A Critical Review** 718
Ira M. Rutkow, MD, Baltimore
Spontaneous rupture is rare but may occur even a month or two after complete clinical recovery.
- Factors Influencing Intraoperative Gastric Regurgitation: A Prospective Random Study of Nasogastric Tube Drainage** 721
Bhagwan Satiani, MB; John T. Bonner, MD; H. Harlan Stone, MD, Atlanta
Silent aspiration during anesthesia in this group of trauma patients was infrequent.
- Missile Tract Infections After Transcolonic Gunshot Wounds** 727
Lewis M. Flint, Jr, MD; Carl R. Voyles, MD; J. David Richardson, MD;
Donald E. Fry, MD, Louisville
When the gunshot wound involves the colon the missile tract should be debrided.
- Operative Cholangiography and Overlooked Stones** 729
Marvin B. Corlette, Jr, MD; Stefan Schatzki, MD; Frederick Ackroyd, MD, Boston
The original operative cholangiogram showed overlooked stones in three fourths of the patients.
Editorial comment by Ward O. Griffen, Jr, MD, PhD, Lexington, Ky
- Antecolic or Retrocolic Anastomoses in Billroth II Gastrojejunostomy?** 735
Stephen G. ReMine, MD; Jonathan A. van Heerden, MB, ChB, FRCS(C), FACS;
Linda Magness, MD; Oliver H. Beahrs, MD, FACS, Rochester, Minn
No statistically significant difference in postoperative morbidity was found between the two.
Editorial comment by Lloyd M. Nyhus, MD, Chicago

CONTENTS—Continued

Right-Sided Diaphragmatic Injury: Rarity or Overlooked Diagnosis?	737
Fredric Jarrett, MD, Louis C. Bernhardt, MD, Madison, Wis	
The true incidence may be higher because of overlooked injuries.	
Editorial comment by Robert J. Freeark, MD, Maywood, Ill	
Cystosarcoma Phylloides in Young Women	742
Åke Andersson, MD, Leif Bergdahl, MD, Kristianstad, Sweden	
Local excision is adequate in most.	
Editorial comment by John S. Welch, MD, Rochester, Minn	
CLINICAL NOTES	
Injury to the Portal Vein: A Hazard During Common Bile Duct Exploration	745
George Tchirkow, MD, Stephen C. Silver, MD, Cleveland	
Bake's dilator perforation of portal vein treated by brief period of compression.	
Hyperparathyroidism Due to Primary Cystic Parathyroid Hyperplasia	748
Orlo H. Clark, MD, San Francisco	
Cystic changes present in all four glands.	
Editorial comment by Virginia A. LiVolsi, MD, New Haven, Conn	
Hemosuccus Pancreaticus (Hemoductal Pancreatitis): Gastrointestinal Hemorrhage Due to Rupture of a Splenic Artery Aneurysm Into the Pancreatic Duct	751
Brack A. Bivins, MD; Charles R. Sachatello, MD;	
Vincent P. Chuang, MD; Patrick Brady, MD, Lexington, Ky	
An unusual cause of gastrointestinal bleeding through the pancreatic duct.	
Hemolytic-Uremic Syndrome Confused With Acute Appendicitis	754
M. Bruce Edmonson, MD, Russell W. Chesney, MD, Madison, Wis	
Abdominal pain is a frequent initial symptom in this syndrome.	
Internal Hernia With Gastric Outlet Obstruction	756
John Boras, MD; Marshall Sparberg, MD; Stuart M. Poticha, MD, Chicago	
Small bowel herniated through the gastrohepatic ligament produced gastric obstruction.	
Burn Unit Management of Toxic Epidermal Necrolysis	758
Robert H. Demling, MD; Suellyn Ellerbe, RN; Nicholas J. Lowe, MB, MRCP, Madison, Wis	
A dermatologic problem similar to a burn which requires burn unit care.	
An Arteriosclerotic Aneurysm of the Hand	762
Sherwin Malt, MD, St Louis	
Resection of radial artery aneurysm and primary anastomosis carried out for this rare lesion.	
Localized Tamponade of the Right Atrium and Right Ventricle: Induction of Intracardiac Right-to-Left Shunting After the Use of a Gott Shunt	764
D. Craig Miller, MD; Philip E. Oyer, MD; William Ricks, MD;	
Paul R. Cipriano, MD; Norman E. Shumway, MD, Stanford, Calif	
Pressure by clot on the right heart produced shunting through an atrial septal defect.	
Transplant Renal Artery Stenosis Occurring in Both Recipients From a Single Donor	767
Geoffrey M. Collins, MB, BS; Kaj Johansen, MD;	
Joseph Bookstein, MD; Nicholas A. Halasz, MD, San Diego	
Transplant stenosis can simulate rejection and may have an immune etiology.
