PAPERS READ BEFORE THE EIGHTY-SIXTH ANNUAL MEETING OF THE WESTERN SURGICAL ASSOCIATION, SCOTTSDALE, ARIZ, NOV 12-15, 1978

Report of a Posthumous Dialogue	359
D. Emerick Szilagyi, MD, Detroit	
The Impact of Prophylactic Measures on Fatal Pulmonary Embolism	366
M. Atik, MD, Los Angeles, Walter L. Broghamer, Jr, MD, Louisville Fewer fatal pulmonary emboli in the last nine years than in the six years before this period.	
White Clot Syndrome: Peripheral Vascular Complications of Heparin Therapy	372
Jonathan B. Towne, MD; Victor M. Bernhard, MD; Clara Hussey, MD; J. C. Garancis, MD, Milwaukee Earliest evidence of intravascular thrombosis caused by heparin is thrombocytopenia.	
Altered Coagulation After Albumin Supplements for Treatment of Oligemic Shock	379
Stemple D. Johnson, MD; Charles E. Lucas, MD; Stanley J. Gerrick, MD; Anna M. Ledgerwood, MD; Roger F. Higgins, PhD, Detroit Albumin given to injured patients was associated with an increased need for blood and plasma.	
Indium 111 Autologous Tagged Leukocytes in the Diagnosis of Intraoperative Sepsis	386
Nancy L. Ascher, MD; David H. Ahrenholz, MD; Richard L. Simmons, MD; Barbara Weiblen, MS; Lucille Gomez; Leroy A. Forstrom, MD; Mathis P. Frick, MD; Clarence Henke, MD; Jeffrey McCullough, MD, Minneapolis A potentially useful test in the diagnosis of postoperative infection.	
Axillo-axillary Bypass for Subclavian Steal Syndrome	394
William O. Myers, MD; Ben R. Lawton, MD; Jefferson F. Ray III, MD; Marvin E. Kuehner, MD; Richard D. Sautter, MD, Marshfield, Wis A very satisfactory approach for patients with subclavian steal.	
Vascular Access: Long-term Results, New Techniques	403
Joseph L. Giacchino, MD; W. Peter Geis, MD, FACS; John M. Buckingham, MB, BS; Leonard L. Vertuno, MD; Vinod K. Bansal, MD, Maywood, Ill A forearm radiocephalic A-V fistula is the preferred vascular access site.	
Suture Material as a Factor in the Occurrence of Anastomotic False Aneurysms: An Analysis of 26 Cases	412
David S. Starr, MD; Stephen C. Weatherford, MD; Gerald M. Lawrie, MD; George C. Morris, Jr, MD, Houston Most aneurysms were due to failure of monofilament plastic or silk sutures.	
Race as a Risk Factor in Cadaver Kidney Transplantation	416
Frank P. Stuart, MD; J. Laurance Hill, MD; Craig R. Reckard, MD; Marguerite Buckingham; Steven Nakamura, Chicago Black recipients had decreased graft survival that could be improved by pretransplant splenectomy.	
The Hartmann Procedure for Complications of Diverticulitis	425
Geoffrey C. Nunes, MD; Ausey H. Robnett, MD; Richard M. Kremer, MD; Richard E. Ahlquist, Jr, MD, Spokane, Wash Removal of the diseased sigmoid colon at the initial operation seems to be beneficial.	

THE ARCHIVES OF SURGERY (ISSN 0004-0010) is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

CHANGE OF ADDRESS: POSTMASTER, send address changes to Helen R. Mazur, Director, Circulation-Fulfillment. Notification of address change should be sent at least six weeks in advance, including both old and new address and a mailing label taken from the most recent copy. Include your new zip code number.

SUBSCRIPTION RATES: The rates for the ARCHIVES OF SURGERY are as follows: for members of the AMA, \$1.50, included in the annual membership dues; for nonmembers, \$24 for one year, \$40 for two years

in the United States and US possessions; all other countries, \$34 for one year, \$60 for two years. Special yearly price to residents, interns, and medical students in the United States and US possessions, one year, \$12; two years, \$20. Address all subscription communications to Circulation-Fulfillment Department.

ADVERTISING OFFICES: 535 N Dearborn St, Chicago, IL 60610, Area Code 312, 751-6675; and 600 Third Ave, New York, NY 10016, Area Code 212, 867-6640.

ADVERTISING PRINCIPLES: Each advertisement in this issue has been reviewed and complies with the principles governing advertising in AMA scientific publications. A copy of these principles is available on request.

CONTENTS—Continued

Diagnostic and Therapeutic Colonoscopy: A Critical Review of 662 Examinations	430
Carl O. Knutson, MD, Martin H. Max, MD, Louisville Finding occult lesions, clarification of questionable x-ray findings, and polyp removal are important uses.	
Gastric Bypass in the Operative Revision of the Failed Jejunioileal Bypass	438
James W. LaFave, MD, John F. Alden, MD, Minneapolis Problems continue to plague operations for obesity.	
Intestinal Strangulation in Germfree and Monocontaminated Dogs	445
Charles E. Yale, MD, DSc, Edward Balish, PhD, Madison, Wis The germfree dog was protected against intestinal strangulation.	
Techniques of Splenic Conservation	449
Leon Morgenstern, MD, Stephen J. Shapiro, MD, Los Angeles Partial resections and hemostatic control of injuries allow conservation of splenic tissue.	
Systems of Trauma Care: A Study of Two Counties	455
John G. West, MD, Irvine, Calif; Donald D. Trunkey, MD; Robert C. Lim, MD, San Francisco An organized system of trauma care virtually eliminated potentially preventable deaths.	
Creatinine Clearance in Critically Ill Surgical Patients	461
Robert F. Wilson, MD; George Soullier; David Antonenko, MD, PhD, Detroit A low creatinine clearance was associated with a high mortality.	
Multiple Adenomas of the Parathyroids: Do They Exist?	468
Jay K. Harness, MD, FACS; Stephen R. Ramsburg, MD; Ronald H. Nishiyama, MD; Norman W. Thompson, MD, FACS, Ann Arbor, Mich Five patients who fulfill the criteria for multiple adenomas are described.	
Cancer of the Parathyroid Glands	475
Jonathan A. van Heerden, MB, FRCS(C); Louis H. Weiland, MD; William H. ReMine, MD, DSc; Joseph T. Walls, MD; Don C. Purnell, MD, Rochester, Minn A large or palpable tumor and high iTPH levels suggest this diagnosis.	
The Continued Importance of Adrenalectomy in the Treatment of Cushing's Disease	481
Richard A. Prinz, MD; Marion H. Brooks, MD; Ann M. Lawrence, MD, PhD; Edward Paloyan, MD, Maywood, Ill Adrenalectomy was effective in patients who did not respond to other forms of treatment.	
Experience With Lobular Carcinoma of the Breast: Emphasis on Recent Aspects of Management	485
Robert P. Davis, MD; Paul F. Nora, MD; Russel G. Kooy, MD; James R. Hines, MD, Chicago The high incidence of bilateral disease was confirmed in this series.	
Peritoneovenous Shunting in the Management of Malignant Ascites	489
Albert K. Straus, MD, PhD; David L. Roseman, MD, MS; Thomas M. Shapiro, MD, Chicago Relief from malignant ascites can be provided with the shunt.	
Failure of Cimetidine Prophylaxis in the Critically Ill	492
Louis F. Martin, MD; Dianne K. Staloch, RN; David A. Simonowitz, MD; E. Patchen Dellinger, MD, Seattle; Martin H. Max, MD, Louisville In certain critically ill patients gastric pH failed to rise above 4, with Cimetidine.	
Early Positive End-Expiratory Pressure in the Adult Respiratory Distress Syndrome	497
John A. Weigelt, MD; Richard A. Mitchell, MD; William H. Snyder III, MD, Dallas Low pressure PEEP instituted early in the course of respiratory distress was helpful.	
Reoperation for Pancreatic Cancer	502
A. Rahim Moossa, MD, FRCS, FACS, Chicago Reoperation on selected patients said to have "incurable pancreatic cancer" can be helpful.	

Continued on p 354.

CONTENTS—Continued

Gastroesophageal Reflux in Infants and Children: Diagnosis and Management 505
Michael H. Schatzlein, MD; Thomas V. N. Ballantine, MD; S. Thirunavukkarasu, MB, BS;
Joseph F. Fitzgerald, MD; Jay L. Grosfeld, MD, Indianapolis
Failure to thrive, vomiting, and aspiration pneumonia suggest this problem in infants.

Evaluation of Intra-gastric pH in Acutely Ill Patients 511
Virginia Herrmann, MD, Donald L. Kaminski, MD, St Louis
Cimetidine produced a higher gastric pH than did intermittent antacid administration.

Reassessment of Simple Cholecystostomy 515
Ernest E. Moore, MD; Glenn L. Kelly, MD; Tim Driver, MD; Ben Eiseman, MD, Denver
Cholecystostomy remains an acceptable procedure for poor-risk patients or when cholecystectomy would be hazardous.

Biliary Decompression in Hilar Obstruction: Round Ligament Approach 519
Stephen E. Dudley, MD; Anthony J. Edis, MD; Martin A. Adson, MD, Rochester, Minn
The left hepatic duct is located by following the obliterated umbilical vein.

Esophageal Atresia: A 41-Year Experience 523
William E. Strodel, MD; Arnold G. Coran, MD; Marvin M. Kirsh, MD; William H. Weintraub, MD;
John R. Wesley, MD; Herbert Sloan, MD, Ann Arbor, Mich
At present, almost all deaths are due to associated anomalies or prematurity.

Our First 35 Patients Studied Five Years After Parietal Cell Vagotomy 528
Paul H. Jordan, Jr, MD, Houston
A safe and effective vagotomy that does not require a drainage procedure.

Effective Surgical Therapy of Esophagitis: Experience With Belsey, Hill, and Nissen Operations 536
Lelan F. Sillin, MD; Robert E. Condon, MD; Stuart D. Wilson, MD; Leonard W. Worman, MD, Milwaukee
All three "valve building" procedures were effective in decreasing or eliminating symptoms.

Reoperation for Disruption and Recurrence After Nissen Fundoplication 542
Lucius D. Hill, MD; Riivo Iives, MD; John K. Stevenson, MD; Joseph M. Pearson, MD, Seattle
Fundoplication may fail by disruption, slipping, or an incompetent original repair.
