EDITORIAL

- The Surgeon and Postoperative Wound Infection** 769
Carl W. Walter, MD, Boston

SYMPOSIUM ON THE OPERATING ROOM ENVIRONMENT

- Introduction** 771
Robert H. Fitzgerald, Jr, MD, Rochester, Minn
- Microbiologic Environment of the Conventional Operating Room** 772
Robert H. Fitzgerald, Jr, MD, Rochester, Minn
Sources of bacterial colonization of the operative wound are reviewed.
- Environmental Bacteriology in the Unidirectional (Horizontal) Operating Room** 778
Carl L. Nelson, MD, Little Rock, Ark
Clean air systems significantly reduce bacterial contamination.
- Environmental Bacteriology in the Unidirectional (Vertical) Operating Room** 784
Charles O. Bechtol, MD, Los Angeles
A vertical flow system provided significantly lower contamination levels.
- Bacteriology of the Operating Room With the Use of Helmet Aspiration Systems** 790
COL John A. Feagin, Jr, MC, USA, San Francisco
The use of this system reduces the number of colony forming particles in the O.R.
- Clean Air Bench: Use for Sterile Maintenance of Unwrapped Surgical Instruments** 798
Charles Fremstad, John S. Welch, MD, Rochester, Minn
Set-up time, takedown time and case turnover time can be diminished.
- Reduction of Deep Sepsis After Total Hip Arthroplasty** 803
Robert H. Fitzgerald, Jr, MD, Rochester, Minn; Charles O. Bechtol, MD, Los Angeles;
Nas Eftekhari, MD, New York; J. Phillip Nelson, MD, Denver
Reduction of airborne contamination appears to decrease deep wound infection.
- Use of Antimicrobials in the Management of Open Fractures** 805
Ramon B. Gustilo, MD, Minneapolis
The role of antibiotics is secondary to debridement, irrigation and definitive wound care.
- Wound Infections in Patients Undergoing Total Hip Arthroplasty: Ultraviolet Light for the Control of Airborne Bacteria** 815
Mary Moggio, MSPH; J. Leonard Goldner, MD; Donald E. McCollum, MD; Stephen F. Beissinger, MD, Durham, NC
Ultraviolet irradiation will effectively reduce risk of airborne bacterial contamination.
- Airflow Effects in Surgery: Perspective of an Era** 826
Harold Laufman, MD, PhD, Bronx, NY

ORIGINAL ARTICLES

- Mycotic Wound Infections: A New Challenge for the Surgeon** 831
Stephen D. Codish, MD, Boston; Ian D. Sheridan, MD, San Diego; Anthony P. Monaco, MD, Boston
A potential problem in high-risk, infection-prone patients.

THE ARCHIVES OF SURGERY (ISSN 0004-0010) is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

CHANGE OF ADDRESS: POSTMASTER, send address changes to Helen R. Mazur, Director, Circulation-Fulfillment. Notification of address change should be sent at least six weeks in advance, including both old and new address and a mailing label taken from the most recent copy. Include your new zip code number.

SUBSCRIPTION RATES: The rates for the ARCHIVES OF SURGERY are as follows: for members of the AMA, \$1.50, included in the annual membership dues; for nonmembers, \$24 for one year, \$40 for two years

in the United States and US possessions; all other countries, \$34 for one year, \$60 for two years. Special yearly price to residents, interns, and medical students in the United States and US possessions, one year, \$12; two years, \$20. Address all subscription communications to Circulation-Fulfillment Department. Phone: 312, 751-6079.

ADVERTISING OFFICES: 535 N Dearborn St, Chicago, IL 60610, Area Code 312, 751-6675; and 600 Third Ave, New York, NY 10016, Area Code 212, 867-6640.

ADVERTISING PRINCIPLES: Each advertisement in this issue has been reviewed and complies with the principles governing advertising in AMA scientific publications. A copy of these principles is available on request.

CONTENTS—Continued

Maintenance of Home Hyperalimentation in Patients With High-Output Jejunostomies	838
David Grischkan, MD; Ezra Steiger, MD; Victor Fazio, MD, Cleveland	
Management of this particularly difficult group of patients can be done at home.	
Diagnostic Errors With Peritoneal Lavage in Patients With Pelvic Fractures	844
Steve G. Hubbard, MD; Brack A. Bivins, MD; Charles R. Sachatello, MD; Ward O. Griffen, Jr, MD, PhD, Lexington, Ky	
A negative lavage is highly reliable but false positives occur with such fractures.	

CLINICAL NOTES

Cardiopulmonary Bypass in Anesthetic Management of Resection: Its Use for Severe Tracheal Stenosis	847
Donald L. Bricker, MD; Thomas M. Parker, MD; Martin L. Dalton, Jr, MD, Lubbock, Tex	
Partial bypass was an adjunct to insure adequate oxygenation in these patients.	
Editorial comment by Vallee L. Willman, MD, St Louis	
Should the Ruptured Renal Allograft Be Removed?	850
Peter Dryburgh, MD, Denver; Kendrick A. Porter, MD, London;	
Ruud A. F. Krom, MD; Kazuharu Uchida, MD; John C. West, MD;	
Richard Weil III, MD; Thomas E. Starzl, MD, PhD, Denver	
Salvage of a ruptured renal allograft by operative repair was accomplished.	
Ureteral Obstruction Secondary to Bifurcated Aortic Grafts	853
Joseph G. Antkowiak, MD, Ronald A. D'Altorio, MD, Pittsburgh	
Obstruction occurred even though the ureters were in correct positions over the grafts.	
Cytomegalovirus Infection of the Colon Associated With Ulcerative Colitis	857
Sylvain Sidi, MD; James H. Graham, MD; Syed A. Razvi, MD; Peter A. Banks, MD, Boston	
Susceptibility may be increased by steroids, general debilitation and immunologic deficiency.	
Abdominal Aortic Aneurysm and Horseshoe Kidney: A Different Perspective	860
O. William Brown, MD; Steven M. Dosick, MD; William S. Blakemore, MD, Toledo, Ohio	
Repair consisted of exclusion and bypass of the aneurysm.	

TECHNIQUE

Nonoperative Internal Drainage of Obstructive Common Bile Ducts	862
Magne Osnes, MD; Odd Geiran, MD; Knut Grønnoeth, MD; Øyvind Havig, MD, Oslo	
A catheter, inserted into the common duct through the ampulla by endoscopy, is left in place for drainage.
