

EDITORIALS

- Obligations of the Amputation Surgeon** 133
Richard Warren, MD, Dedham, Mass
- The Declining Role of the Surgeon in the Treatment of Acid-Peptic Diseases** 134
Israel Penn, MD, Denver

ORIGINAL ARTICLES

- Multiple System Organ Failure: The Role of Uncontrolled Infection** 136
Donald E. Fry, MD; Leslie Pearlstein, MD; Robert L. Fulton, MD; Hiram C. Polk, Jr, MD, Louisville
Multiple system organ failure is the most common fatal expression of uncontrolled infection.
- Clinical Characteristics Distinguishing Hereditary From Sporadic Medullary Thyroid Carcinoma: Treatment Implications** 142
Melvin A. Block, MD; Charles E. Jackson, MD; Kenneth A. Greenawald, MD; Joann B. Yott, RN, Detroit;
Armen H. Tashjian, Jr, MD, Boston
Hereditary type is distinguished by bilaterality, C cell hyperplasia and frequent endocrine lesions elsewhere.
- Malignant Soft-Tissue Tumors of the Anterior Abdominal Wall** 152
Man H. Shiu, MD; Louis Flancbaum, MD; Steven I. Hajdu, MD; Joseph G. Fortner, MD, New York
The differences between desmoid tumors and fully malignant sarcomas are emphasized.
- Acute Cholecystitis: Comparison of Ultrasound and Intravenous Cholangiography** 158
Sidney Ulreich, MD; Kendall W. Foster, MD; Steven A. Stier, MD, New Britain, Conn;
Arthur T. Rosenfield, MD, New Haven, Conn
Ultrasound is recommended as the initial screening procedure in suspected acute cholecystitis.
- Hemobilia After Percutaneous Transhepatic Biliary Drainage** 161
Morito Monden, MD; Jun Okamura, MD; Nobuyuki Kobayashi, MD; Nobuhiro Shibata, MD; Shinichi Horikawa, MD;
Takayoshi Fujimoto, MD; Goro Kosaki, MD; Chikazumi Kuroda, MD; Hideo Uchida, MD, Osaka, Japan
Primary management consists of maintaining continuous drainage.
- Morbid Implications of Above-Knee Amputations: Report of a Series and Review of the Literature** 165
Charles C. Huston, MD; Brack A. Bivins, MD; Calvin B. Ernst, MD; Ward O. Griffen, Jr, MD, PhD, Lexington, Ky
The mortality is high because the patients are elderly and have generalized vascular disease.
- Revascularization for Severe Limb Ischemia** 168
Garland D. Perdue, MD; Robert B. Smith III, MD; Charles R. Veazey, MD; Joseph D. Ansley, MD, Atlanta
Initial limb salvage was 92% in patients operated on for rest pain and/or tissue necrosis.
- Hepatic Trauma: A Review of 56 Consecutively Treated Patients** 175
Don R. Miller, MD; Joseph M. Bernstein, MD, Irvine, Calif
Mortality from hepatic trauma should be low if the hepatic veins or vena cava are not involved.
- In Situ Cold Perfusion of Kidneys for Transplantation: An Experimental and Clinical Evaluation** 180
Paul J. Garvin, MD; James D. Buttorff, MD; Robert Morgan, RN; John E. Codd, MD, St Louis
Immediate cold perfusion after cardiac standstill in cadaver donors seemed helpful.

THE ARCHIVES OF SURGERY (ISSN 0004-0010) is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

CHANGE OF ADDRESS: POSTMASTER, send address changes to Helen R. Mazur, Director, Circulation-Fulfillment. Notification of address change should be sent at least six weeks in advance, including both old and new address and a mailing label taken from the most recent copy. Include your new zip code number.

SUBSCRIPTION RATES: The rates for the ARCHIVES OF SURGERY are as follows: for members of the AMA, \$1.50, included in the annual membership dues; for nonmembers, \$24 for one year, \$40 for two years

in the United States and US possessions; all other countries, \$34 for one year, \$60 for two years. Special yearly price to residents, interns, and medical students in the United States and US possessions, one year, \$12; two years, \$20. Address all subscription communications to Circulation-Fulfillment Department. Phone: 312, 751-6079.

ADVERTISING OFFICES: 535 N Dearborn St, Chicago, IL 60610, Area Code 312, 751-6675; and 600 Third Ave, New York, NY 10016, Area Code 212, 867-6640.

ADVERTISING PRINCIPLES: Each advertisement in this issue has been reviewed and complies with the principles governing advertising in AMA scientific publications. A copy of these principles is available on request.

CONTENTS—Continued

Carotid Stenosis Plus Occlusion: Endarterectomy or Bypass? 183
William Gee, MD; Kenneth M. McDonald, MD; Harry A. Kaupp, MD; Victor J. Celani, MD; Roger G. Bast, MS, Allentown, Pa
Endarterectomy of the stenosed artery improved ophthalmic pressure bilaterally.

Diagnostic Accuracy of Ocular Pneumoplethysmography Attachment for Pulse Volume Recorder 190
Henry D. Berkowitz, MD, Philadelphia
This method has greater sensitivity to minor degrees of carotid narrowing.

Acquired Double Pylorus due to Gastroduodenal Fistula Complicating Peptic Ulceration 194
Gary G. Ghahremani, MD; Richard M. Gore, MD; William R. Fields, MD, Evanston, Ill
The presence of such a fistula is not an indication for operation.

CASE REPORTS

Chronic Granulomatous Disease in an Adult With Recurrent Abscesses 200
Henry B. Perry, MD, PhD, Portland, Me; Michael Boulanger, MD, Boston; Douglass Pennoyer, MD, Portland, Me
Patients with repeated infections should have studies of both the cellular and humoral immunological systems.
Editorial comment by J. Wesley Alexander, MD, Cincinnati

Infected Prosthetic Grafts: Local Therapy With Graft Preservation 203
Julio Popovsky, MD, Sanford Singer, MD, Cleveland
Debridement, irrigation, and antibiotics salvaged infected but patent prostheses in the groin.
Editorial comment by D. Emerick Szilagyi, MD, Detroit

EXPERIMENTAL SURGERY

Role of the Systemic Vasculature in the Hemodynamic Response to Changes in Plasma Ionized Calcium 206
Daniel Scheidegger, MD; Lambertus J. Drop, MD, PhD; Jean-Claude Schellenberg, MD, Boston
Decreased stroke volume was observed only with hypocalcemia and beta blockade.

TECHNIQUES

Restoring Patency of Occluded Central Venous Catheters 212
Michel R. Hurtubise, MD; Joseph C. Bottino, MD; Millie Lawson, RN; Kenneth B. McCredie, MD, Houston
A dilute fibrinolytic agent is safe and effective for this purpose.

Protecting the High-Risk Rectal Anastomosis 214
Arie L. Durst, MD, Herbert Freund, MD, Jerusalem
This technique lessens the possibility of anastomotic leakage.
Editorial comment by John S. Welch, MD, Rochester, Minn

SPECIAL ARTICLE

Hemodynamics for the Vascular Surgeon 216
Robert W. Barnes, MD, Richmond, Va
Basic principles of fluid dynamics and material properties underlie many aspects of vascular disease.

REVIEW ARTICLE

The Value of No-Touch Isolation Technique for Resection of Cancer: The Eye as a Model 224
John A. McCubbin, MD, John S. Spratt, MD, Louisville
Surgical techniques can and should be modified to occlude channels of egress of cells and to avoid manipulative pressure.
Editorial comment by Jerome J. DeCosse, MD, New York
