PAPERS READ BEFORE THE SECOND ANNUAL MEETING OF THE SURGICAL INFECTION SOCIETY, BOSTON, APRIL 19-20, 1982—PART I

- Frank L. Meloney: Pioneer Surgeon-Bacteriologist: Presidential Address** 151
William R. Sandusky, MD, Charlottesville, Va
- Partial Analysis and Purification of Polymorphonuclear Neutrophil Chemotactic Inhibitors in Serum From Anergic Patients** 156
Nicholas V. Christou, MD, PhD, FRCS(C);
Jonathan L. Meakins, MD, DSc, FRCS(C), Montreal
The system of polymorphonuclear chemotaxis modulation is very complex.
- Mechanisms of In Vitro Sensitivity to Sulfadiazine Silver** 161
Albert T. McManus, PhD; Camille L. Denton, MA;
Arthur D. Mason, Jr, MD, Fort Sam Houston, Tex
The use of sulfadiazine silver can lead to development of organisms resistant not only to sulfonamides but to other antibiotics as well.
- Exchange of Amino Acids by Muscle and Liver in Sepsis: Comparative Studies In Vivo and In Vitro** 167
Szymon Rosenblatt, MD; George H. A. Clowes, Jr, MD; Barbara C. George, MD;
Erwin Hirsch, MD; Bengt Lindberg, MD, Boston
Failure to maintain a high rate of visceral amino acid uptake is associated with ultimate death from sepsis.
- Substrate Composition and Sepsis: Effects on Immunity** 176
Timothy J. Mullin, MD, John R. Kirkpatrick, MD, Detroit
The combination of substrate mixtures was not a determinant in enhancing immune responsiveness.
- Relative Efficacy and Critical Interval of Antimicrobial Agents in Experimental Infections Involving *Bacteroides fragilis*** 181
John G. Bartlett, MD; Manojeh Dezfulian, MD, Baltimore;
Keith Joiner, MD, Bethesda, Md
When treatment was delayed there was a marked reduction in antimicrobial activity except with metronidazole.
- Gamma Scintigraphic Localization of Platelets Labeled With Indium 111 in a Focus of Infection** 185
Harvey J. Sugarman, MD; James L. Tatum, MD; Jerry I. Hirsch, PharmD;
David E. Sharp, MD, PhD; Ghulam D. Qureshi, MD;
Philip B. Hylemon, PhD, Richmond, Va
Uptake of platelets in a focus of infection was demonstrated.
- Third-Generation Cephalosporins for Polymicrobial Surgical Sepsis** 193
H. Harlan Stone, MD; Priscilla R. Strom, MD;
Timothy C. Fabian, MD; William E. Dunlop, MD, Atlanta
Third-generation cephalosporins were as effective as gentamicin plus clindamycin.

THE ARCHIVES OF SURGERY (ISSN 0004-0010) is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

SUBSCRIPTION RATES—The subscription rates for the Archives of Surgery are as follows: for members of the AMA, \$1.50 included in the annual membership dues; for nonmembers, \$30 for one year, \$56 for two years in the United States and US possessions; all other countries, one year, \$40; two years, \$76 (add \$10 surcharge to each one-year subscription, \$20 for two years for air delivery to the United Kingdom and Europe only). Special yearly rates to residents and medical students in the United States and US

possessions, one year, \$15; two years, \$28. Address all subscription communication to American Medical Association, Circulation and Fulfillment Division, 535 N Dearborn St, Chicago, IL 60610. Phone: (312) 751-6079.

CHANGE OF ADDRESS—POSTMASTER, send address changes to Caryl L. Wertheimer, Director of Fulfillment, 535 N Dearborn St, Chicago, IL 60610. Notification of address change must be made at least six weeks in advance, including both old and new addresses, and a mailing label taken from the most recent copy. Include your new zip code number.

ADVERTISING PRINCIPLES: Each advertisement in this issue has been reviewed and complies with the principles governing advertising in AMA scientific publications. A copy of these principles is available on request.

Penetration of Eight β-Lactam Antibiotics Into the Peritoneal Fluid: A Pharmacokinetic Investigation	205
Dietmar H. Wittman, MD, PhD, Hans-H. Schassan, MD, PhD, Hamburg, West Germany High concentrations of these agents were found in fluid from peritoneal drains within one hour.	
Fungal Sepsis in Surgical Patients	217
Kenneth W. Burchard, MD; Lloyd B. Minor, MD; Gus J. Slotman, MD; Donald S. Gann, MD, Providence, RI Amphotericin B is the treatment of choice for disseminated fungemia.	
Prophylactic Antibiotics in Colon Surgery: Cephaloridine v Erythromycin and Neomycin	227
H. Turner Edmondson, MD, J. Peter Rissing, MD, Augusta, Ga With erythromycin-neomycin there were fewer wound infections than with cephaloridine.	
'Breakthrough' Enterococcal Septicemia in Surgical Patients: 19 Cases and a Review of the Literature	232
Steve H. Dougherty, MD; Anna B. Flohr, RN; Richard L. Simmons, MD, Minneapolis The enterococcus may emerge as a blood-borne pathogen in immunodepressed, postoperative patients receiving antibiotics.	
Determinants of Organ Malfunction or Death in Patients With Intra-abdominal Sepsis: A Discriminant Analysis	242
Richard W. Pine, MD; Margaret J. Wertz, MN, RN; E. Stan Lennard, MD, ScD; E. Patchen Dellinger, MD; C. James Carrico, MD; Barbara H. Minshew, PhD, Seattle Risk factors associated with multiple organ failure and death were shock, age above 65 years, alcoholism, bowel infarction, and malnutrition.
