

**PAPERS READ BEFORE THE FOURTH ANNUAL MEETING OF THE SURGICAL  
INFECTION SOCIETY, MONTREAL, APRIL 30 to MAY 1, 1984—PART 1**

- William A. Altemeler, MD: Surgeon and Bacteriologist: Presidential Address** ..... 13  
Jonathan E. Rhoads, MD, DSc(Med), Philadelphia
- Reliability of Criteria for Predicting Persistent or Recurrent Sepsis** ..... 17  
H. Harlan Stone, MD; Audra A. Bourneuf, RN; Lenora D. Stinson, RN, Baltimore  
Sepsis did not recur after discontinuing antibiotics if temperature  
and WBC and differential cell counts were normal.
- Surgical Infection Stratification System for Intra-abdominal Infection:  
Multicenter Trial** ..... 21  
E. Patchen Dellinger, MD, Margaret J. Wertz, MN, RN, Seattle;  
Jonathan L. Meakins, MD, DSc, Montreal; Joseph S. Solomkin, MD, Cincinnati;  
Maria D. Allo, MD, Baltimore; Richard J. Howard, MD, Gainesville, Fla;  
Richard L. Simmons, MD, Minneapolis  
Severity of illness, age, and malnutrition were most important  
in predicting outcome in patients with intra-abdominal infection.
- Myocardial Dysfunction in Septic Shock** ..... 30  
Richard H. Carmona, MD; Tanny Tsao, MS; Michael Dae, MD;  
Donald D. Trunkey, MD, San Francisco  
Myocardial dysfunction in septic shock may be due to endogenously  
released or accumulated cell toxic factors.
- Inhibition of  $\beta$ -Lactamase-Induced Resistance in Soft-Tissue Infections** ..... 36  
Ronald Lee Nichols, MD; Jeffrey W. Smith, MS, MPH; Michael F. Adinolfi, MD;  
Randi Galli; Luciana M. Vivoda, MD, MPH, New Orleans  
Sulbactam plus either penicillin or ampicillin was relatively  
safe and efficacious.
- Mechanisms of Action of Two New Immunomodulators** ..... 43  
J. Paul Waymack, MD; Sara Gonce; Phillip Miskell;  
J. Wesley Alexander, MD, ScD, Cincinnati  
These compounds stimulated different parts of the immune system.
- Enhanced Survival During Murine Gram-negative Bacterial Sepsis  
by Use of a Murine Monoclonal Antibody** ..... 50  
David L. Dunn, MD, Minneapolis; Warren C. Bogard, Jr, PhD, Malvern, Pa;  
Frank B. Cerra, MD, Minneapolis  
Protection was provided by the monoclonal antibody, but only for  
the specific organism and lipopolysaccharide.
- Enterococcal Bacteremia in Surgical Patients** ..... 57  
David T. Barrall, MD; Pardon R. Kenney, MD; Gus J. Slotman, MD;  
Kenneth W. Burchard, MD; Providence, RI  
Antienterococcal therapy was helpful in patients who also had  
preceding or concomitant gram-positive bacteremia.

**THE ARCHIVES OF SURGERY** (ISSN 0004-0010) is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

**SUBSCRIPTION RATES**—The subscription rates for the Archives of Surgery are as follows: for members of the AMA, \$1.50 included in the annual membership dues; for nonmembers, \$36 for one year, \$65 for two years in the United States and US possessions; all other countries, one year, \$46; two years, \$85 (add \$10 surcharge to each one-year subscription, \$20 for two years for air delivery to the United Kingdom and Europe only). Special yearly rates to residents and medical students in the United States and US possessions, one year, \$18; two years, \$32.50. Rates for subscriptions for delivery to Bangladesh, India, Japan, Nepal, South Korea, and Sri Lanka are

available through respective exclusive agents. Address all subscription communications to the American Medical Association, Circulation and Fulfillment Division, 535 N Dearborn St, Chicago, IL 60610. Phone: (312) 280-7154.

**CHANGE OF ADDRESS**—POSTMASTER, send all address changes to Caryl L. Wertheimer, Director of Fulfillment, 535 N Dearborn St, Chicago, IL 60610. Notification of address change must be made at least six weeks in advance, include both old and new addresses, a recent mailing label, and your new zip code.

**ADVERTISING PRINCIPLES:** Each advertisement in this issue has been reviewed and complies with the principles governing advertising in AMA scientific publications. A copy of these principles is available on request.

**CONTENTS—Continued**

<b>Gut-Liver Interaction During Accelerated Gluconeogenesis</b> .....	<b>66</b>
Wiley W. Souba, MD, Douglas W. Wilmore, MD, Boston	
The gut and kidney both spare glucose and produce alanine in response to glucocorticoid administration.	
<b>The Application of Antibiotic Bonding to the Treatment of Established Vascular Prosthetic Infection</b> .....	<b>71</b>
Ralph S. Greco, MD; Stanley Z. Trooskin, MD; Anthony P. Donetz; Richard A. Harvey, PhD, New Brunswick, NJ	
Antibiotic bonded grafts developed fewer infections when used to replace infected grafts.	
<b>Failure of Local Immunity: A Potential Cause of Burn Wound Sepsis</b> .....	<b>78</b>
Edwin A. Deitch, MD, Shreveport, La; Marek Dobke, MD, PhD; Charles R. Baxter, MD, Dallas	
An opsonic defect in burn blister fluid seemed to be due to local consumption of complement.	
<b>Transplant Site Affects Splenic T- and B-Cell Survival and Function</b> .....	<b>89</b>
Charles D. Livingston, MD; Mary Pat Moyer, PhD; Barry A. Levine, MD; Kenneth R. Sirinek, MD, PhD, San Antonio, Tex	
Subcutaneous splenic autotransplants showed marked and progressive loss of B- and T-cell lymphocytes.	
<b>Regulation of Neutrophil Superoxide Production in Sepsis</b> .....	<b>93</b>
Joseph S. Solomkin, MD; Leala A. Cotta; Julia K. Brodt; James M. Hurst, MD, Cincinnati	
Neutrophils from septic patients had depressed superoxide production in response to a nonphagocytic stimulus.	
<b>Serum Level Monitoring of Aminoglycoside Antibiotics: Limitations in Intensive Care Unit-Related Bacterial Pneumonia</b> .....	<b>99</b>
Lewis M. Flint, MD; John Gott, MD; Lisa Short, RPh; J. David Richardson, MD; Hiram C. Polk, Jr, MD, Louisville	
Routine monitoring of serum levels detected subtherapeutic antibiotic levels, but did not predict or avoid nephrotoxicity.	
<b>Determination of C3b Receptors: On Normal and Patient Polymorphonuclear Neutrophils With C3b-Coated Fluorescent Microspheres</b> .....	<b>104</b>
James D. Ogle, PhD; Cora K. Ogle, PhD; J. Greg Noel, MS; Joseph S. Solomkin, MD; J. Wesley Alexander, MD, ScD, Cincinnati	
Increases in receptor number seemed to coincide with enhanced neutrophil bactericidal function.	
<b>REGULAR DEPARTMENTS</b>	
<b>Consultants</b> .....	<b>112</b>
<b>Correspondence and Brief Communications</b> .....	<b>116</b>
Opacification for Arteriography Andrew B. Crummy, MD, Erhard E. Starck, MD, Madison, Wis	
<b>Calendar of Events</b> .....	<b>116</b>
<b>Books</b> .....	<b>117</b>
<b>Current Emergency Diagnosis and Treatment</b> (Mills, Ho, Trunkey) Reviewed by Charles E. Saunders, MD, Denver . . . <b>The Breast</b> (McDivitt, Oberman, Ozello, et al, eds) Reviewed by Ben Eiseman, MD, Denver . . . <b>Pulmonary Physiology in Clinical Medicine</b> (Tisi) Reviewed by Melvin M.
