

**ORIGINAL ARTICLES**

- Rapid Intra-abdominal Spread of Pancreatic Cancer:  
Influence of Multiple Operative Biopsy Procedures** ..... 415  
Stephen M. Weiss, MD; John M. Skibber, MD; Mohammed Mohiuddin, MD;  
Francis E. Rosato, MD, Philadelphia  
An association between multiple operative biopsies and  
intra-abdominal spread of tumor is suggested.
- Gastrointestinal Myoelectric Activity In Fasting and Nonfasting  
Canine Models of Ileus** ..... 417  
Robert E. Brolin, MD; Michael T. Reddell; Donald A. Thompson, New Brunswick, NJ  
Postoperative gastrointestinal myoelectric activity is significantly  
less than in normal dogs but returns to normal in 48 to 72 hours.
- An Objective Assessment of the Physiologic Changes  
In the Postthrombotic Syndrome** ..... 424  
Lois A. Killewich, MD, PhD; Robert Martin; Miles Cramer;  
Kirk W. Beach, MD, PhD; D. E. Strandness, Jr, MD, Seattle  
Most sequelae of the postthrombotic syndrome can be  
attributed to loss of valve function.
- Efficacy of Low-Dose Streptokinase In Acute Arterial Occlusion and  
Graft Thrombosis** ..... 427  
Job S. Kakkasseri, MD; John J. Cranley, MD; James J. Arbaugh, MD;  
L. Richard Roedersheimer, MD; Richard E. Welling, MD, Cincinnati  
Local thrombolysis using infusions of streptokinase was successful in  
43% of patients but complications, including hemorrhage and distal  
embolization, were common.
- Neutrophil Delivery to Wounds of the Upper and Lower Extremities** ..... 430  
William Lineaweaver, MD; James Seeger, MD; Ann Andel, RN, MA;  
Thomas Rumley, MD; Richard Howard, MD, Gainesville, Fla  
Neutrophil delivery to upper-extremity wounds was significantly  
higher than to those in the lower extremities.
- Postgastrectomy Phytobezoars—Endoscopic Diagnosis and Treatment** ..... 432  
Nancy A. Dietrich, MD, Frederick C. Gau, MD, Evanston, Ill  
One hundred percent of patients with postgastrectomy bezoars were  
treated with endoscopic fragmentation instead of operation.

**THE ARCHIVES OF SURGERY** (ISSN 0004-0010) is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

**SUBSCRIPTION RATES**—The subscription rates for the Archives of Surgery are as follows: for members of the AMA, \$1.50 included in the annual membership dues; for nonmembers, \$36 for one year, \$65 for two years in the United States and US possessions; all other countries, one year, \$46; two years, \$85 (add \$10 surcharge to each one-year subscription, \$20 for two years for air delivery to the United Kingdom and Europe only). Special yearly rates to residents and medical students in the United States and US possessions, one year, \$18; two years, \$32.50. Rates for subscriptions for delivery to Bangladesh, India, Japan, Nepal, South Korea, and Sri Lanka are available through respective exclusive agents. Address all subscription

communications to the American Medical Association, Circulation and Fulfillment Division, 535 N Dearborn St, Chicago, IL 60610. Phone: (312) 280-7154.

**CHANGE OF ADDRESS**—POSTMASTER, send all address changes to Caryl L. Wertheimer, Director of Fulfillment, 535 N Dearborn St, Chicago, IL 60610. Notification of address change must be made at least six weeks in advance, include both old and new addresses, a recent mailing label, and your new zip code.

**ADVERTISING PRINCIPLES:** Each advertisement in this issue has been reviewed and complies with the principles governing advertising in AMA scientific publications. A copy of these principles is available on request. The appearance of advertising in AMA publications is not an AMA guarantee or endorsement of the product or the claims made for the product by the manufacturer.

**CONTENTS—Continued**

<b>Prediction of Heparin Requirements in Acute Thromboplastic Venous Disease</b> .....	<b>436</b>
Bonnie L. Beaver, MD; Donn Young, PhD; Bhagwan Satiani, MB, BS, Columbus, Ohio Initial heparin requirements may be higher in patients with deep venous thrombosis and pulmonary embolism.	
<b>Oxidation-Reduction Maintenance in Organ Preservation</b> .....	<b>439</b>
Max Jellinek, PhD; Marco Castaneda, MD; Paul J. Garvin, MD; Michael Niehoff, Pa-C, MS(R); John E. Codd, MD, St Louis An optimal oxidation-reduction potential prevented or repaired oxidative effects of ischemic injury in isolated perfused kidneys.	
<b>Correlation of B-Mode Ultrasound Imaging and Arteriology With Pathologic Findings at Carotid Endarterectomy</b> .....	<b>443</b>
Thomas F. O'Donnell, Jr, MD; Luke Erdoes, MD; William C. Mackey, MD; James McCullough, MD; Alex Shepard, MD; Paul Heggerick, RVT; Jeffrey Isner, MD; Allan D. Callow, MD, Boston B-Mode ultrasound offered significant advantages over arteriography in detecting carotid disease as determined by comparing results to pathologic examination of specimens.	
<b>Surgical Management of Perforated Colonic Diverticulitis</b> .....	<b>450</b>
Louis Auguste, MD; Edgar Borrero, MD; Leslie Wise, MD, New Hyde Park, NY Primary resection of acutely perforated diverticulitis provided a lower mortality and shorter hospital stay than did staged resection.	
<b>Experimental Posttraumatic Pulmonary Microembolism: Effects of Methylprednisolone on Its Development</b> .....	<b>453</b>
Ingvar Jansson, MD, PhD; Björn Bäckstrand, MD; Lennart Rammer, MD, PhD; Sten Lennquist, MD, PhD, Linköping, Sweden Steroids delay but do not prevent pulmonary microembolism after high-energy limb trauma.	
<b>Role of Activated Carbon Hemoperfusion in the Recovery of Livers Exposed to Ischemic Damage</b> .....	<b>462</b>
Luis H. Toledo-Pereyra, MD, PhD, Detroit Activated carbon hemoperfusion significantly improved survival in dogs after ischemic liver injury.	
<b>Actuarial Analysis of the Risk of Prosthetic Valve Endocarditis in 1,598 Patients With Mechanical and Bioprosthetic Valves</b> .....	<b>469</b>
Robert Rutledge, MD; B. Justin Kim, MD; Robert E. Applebaum, MD, Bethesda, Md Risk of prosthetic valve endocarditis is high during the first 15 days after operation but late risk falls to one episode per 100,000 patient days.	
<b>Recurrent Laryngeal Nerve Palsy in Thyroid Gland Surgery Related to Operations and Nerves at Risk</b> .....	<b>475</b>
Hans Mårtensson, MD, PhD, Lund, Sweden, Janis Terins, MD, Norrköping, Sweden Patients undergoing a secondary operation had a much higher incidence of nerve palsy than those having a primary procedure.	

*Continued on page 398.*

**Arterial Infusion of Dacarbazine and Cisplatin for Recurrent Regionally Confined Melanoma** ..... 478  
 Daniel B. Frost, MD; Yehuda Z. Patt, MD; Giora Mavligit, MD;  
 Vincent P. Chuang, MD; Sidney Wallace, MD, Houston  
 Forty-four percent of recurrent limb melanomas responded to an arterial infusion of dacarbazine and cisplatin.

**Systolic Properties of Normal and Septic Isolated Rat Hearts: The Effect of Branched Chain Amino Acids** ..... 483  
 Herbert R. Freund, MD; Eldad J. Dann, MD; Felicia Burns, MPharm;  
 Mervyn S. Gotsman, MD; Yonathan Hasin, MD, Jerusalem  
 In the isolated perfused septic rat heart, mechanical washout during perfusion and a balanced amino acid mixture perfusate were beneficial.

**CLINICAL NOTES**

**Percutaneous Transluminal Angioplasty of Stenotic Deep Vein Arterial Bypass Grafts** ..... 492  
 Bernard Greenspan, MD; George Pillari, MD; Martin L. Schulman, MD;  
 Mohan Badhey, MD, New Hyde Park, NY  
 Successful percutaneous angioplasty was performed in six patients approximately six months after femoral artery stenosis bypass.

**Complications After Use of the Angelchik Antireflux Prosthesis** ..... 498  
 Paul M. Burke, Jr, MD; Walter J. Chwals, MD;  
 F. Henry Ellis, Jr, MD, PhD, Burlington, Mass  
 Other, safer antireflux operations should be the preferred form of therapy for reflux esophagitis.

**Treatment of Lymphocele in Renal Allograft Recipients** ..... 501  
 Burt M. Greenberg, MD; Leonard J. Perloff, MD; Robert A. Grossman, MD;  
 Ali Najj, MD; Clyde F. Barker, MD, Philadelphia  
 The symptoms of a lymphocele may mimic allograft rejection.
