

**PAPERS READ BEFORE THE 6TH ANNUAL MEETING OF THE SURGICAL INFECTION SOCIETY,  
CHICAGO, APRIL 21-22, 1986—PART II**

- Sepsis Score and Acute-Phase Protein Response as Predictors of Outcome in Septic Surgical Patients** ..... 141  
Lorenzo Dominioni, MD, Renzo Dionigi, MD, FACS, Pavia, Italy; Marco Zanella, MD, Bologna, Italy; Roberto Monico, MD; Riccarda Cremaschi, MD; Roberto Dionigi, MD; Andrea Ballabio, MD; Margherita Massa; Mario Comelli, Pavia, Italy; Paolo Dal Ri, MD, Trento, Italy; Paolo Pisati, Pavia, Italy  
A sepsis index of survival was calculated by a formula using certain acute-phase proteins and severity of infection.
- Ketoconazole Prevents *Candida* Sepsis in Critically Ill Surgical Patients** ..... 147  
Gus J. Slotman, MD, Kenneth W. Burchard, MD, Providence, RI  
Yeast colonization and invasive yeast sepsis were reduced by this antifungal compound.
- Reducing Wound Infections: Improved Gown and Drape Barrier Performance** ..... 152  
Joseph A. Moylan, MD; Kevin T. Fitzpatrick, PA; Kevan E. Davenport, PA, Durham, NC  
A disposable gown and drape system was less expensive and was associated with fewer wound infections.
- Design and Conduct of Antibiotic Trials: A Report of the Scientific Studies Committee of the Surgical Infection Society** ..... 158  
Joseph S. Solomkin, MD, Cincinnati; E. Patchen Dellinger, MD, Seattle; Nicolas V. Christou, MD, Montreal; Arthur D. Mason, Jr, MD, San Antonio, Tex  
The number and complexity of factors influencing outcome make definitive trials difficult to design and conduct.
- Assessing Operative Site Infection in Surgical Patients** ..... 165  
Nicolas V. Christou, MD, PhD, FRCS(C); Carl W. Nohr, MD; Jonathan L. Meakins, MD, DSc, FRCS(C), Montreal  
The three determinants of an infection were host defense, physiologic derangement, and bacterial contamination risk at operation.
- Surgery in Patients With Acquired Immunodeficiency Syndrome** ..... 170  
Gene Robinson, MD; Samuel E. Wilson, MD; Russell A. Williams, MD, Torrance, Calif  
Operative intervention in AIDS patients is required most often for infections and neoplasms associated with immune deficiency.
- Suppression of Interleukin 2 Production in an Animal Model of Thermal Injury Is Related to Prostaglandin Synthesis** ..... 179  
J. Jeremy Wood, BM, FRCS; John T. Grbic, DMD; Mary L. Rodrick, PhD; Andrea Jordan; John A. Mannick, MD, Boston  
Prostaglandin-mediated effects seem to be involved in reduced interleukin 2 production after burns.

The ARCHIVES OF SURGERY (ISSN 0004-0010) is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

**SUBSCRIPTION RATES**—The subscription rates for the Archives of Surgery are as follows: for members of the AMA, \$1.50 included in the annual membership dues; for nonmembers, \$38 for one year, \$68 for two years in the United States and US possessions; all other countries, one year, \$50; two years, \$92 (add \$15 surcharge to each one-year subscription, \$30 for two years for air delivery to the United Kingdom, Europe, Bangladesh, India, Nepal, or Sri Lanka). Special yearly rates to residents and medical students in the United States and US possessions, one year, \$19; two years, \$34. Rates for subscriptions for delivery to Australia, Japan, New Zealand, or South Korea are available through respective exclusive agents. Address all

subscription communications to the American Medical Association, Circulation and Fulfillment Division, 535 N Dearborn St, Chicago, IL 60610. Phone: (312) 280-7154.

**CHANGE OF ADDRESS**—POSTMASTER, send all address changes to Caryl L. Wertheimer, Director of Fulfillment, 535 N Dearborn St, Chicago, IL 60610. Notification of address change must be made at least six weeks in advance, include both old and new addresses, a recent mailing label, and your new zip code.

**ADVERTISING PRINCIPLES:** Each advertisement in this issue has been reviewed and complies with the principles governing advertising in AMA scientific publications. A copy of these principles is available on request. The appearance of advertising in AMA publications is not an AMA guarantee or endorsement of the product or the claims made for the product by the manufacturer.

## CONTENTS—Continued

<b>Endotoxin Promotes the Translocation of Bacteria From the Gut</b> .....	185
Edwin A. Deitch, MD; Rodney Berg, PhD; Robert Specian, PhD, Shreveport, La Endotoxin given intraperitoneally or intramuscularly promotes bacteria crossing the mucosal barrier of the bowel.	
<b>Kupffer Cell Modulation of the Systemic Immune Response</b> .....	191
John C. Marshall, MD, FRCS(C); Chen Lee, MD; Jonathan L. Meakins, MD, DSc, FRCS(C); Rene P. Michel, MD, FRCP(C); Nicolas V. Christou, MD, PhD, FRCS(C), Montreal Kupffer cell activation and toxic hepatic injury depressed the delayed hypersensitivity response.	
<b>Neutrophil Function in a Rat Model of Endotoxin-Induced Lung Injury</b> .....	197
Richard K. Simons, MB, FRCS; Ronald V. Maier, MD; Stan Lennard, MD, ScD, Seattle With endotoxemia, neutrophils had increased superoxide production and decreased myeloperoxidase activity.	
<b>Effect of Altered Volume of Distribution on Aminoglycoside Levels in Patients in Surgical Intensive Care</b> .....	207
Paul W. Niemiec, Jr, PharmD; Maria D. Allo, MD; Clair F. Miller, MD, Baltimore A larger loading dose and close monitoring of serum concentrations are needed in septic surgical patients.	
<b>Flow Cytometric Measurement of Rat Lymphocyte Subpopulations After Burn Injury and Burn Injury With Infection</b> .....	216
David G. Burleson, PhD; George K. Vaughn; Arthur D. Mason, Jr, MD; Basil A. Pruitt, Jr, MD, Fort Sam Houston, Tex A decreased ratio of helper to suppressor lymphocytes may result from infection rather than contribute to its development.	
<b>Local Heat Increases Blood Flow and Oxygen Tension in Wounds</b> .....	221
John M. Rabkin, MD, Thomas K. Hunt, MD, San Francisco Warmth may have value in the prevention of infection.	
<b>Effect of Insulin on Amino Acid Uptake and Protein Turnover in Skeletal Muscle From Septic Rats: Evidence for Insulin Resistance of Protein Breakdown</b> .....	228
Per-Olof Hasselgren, MD, PhD; Brad W. Warner, MD; J. Howard James; Hiroo Takehara, MD; Josef E. Fischer, MD, Cincinnati Protein breakdown was not inhibited as much by insulin in muscles from septic animals.	
<b>Inhibition of Lymphocyte Proliferation by Fluid-Phase C3b as Influenced by Macrophages</b> .....	234
Cora K. Ogle, PhD; James D. Ogle, PhD; Carol Johnson; Linette Keynton; J. Wesley Alexander, MD, ScD, Cincinnati A cleavage component of complement C3b inhibits lymphocyte proliferation in the presence of macrophages.	
<b>PANEL DISCUSSION—SURGICAL INFECTION SOCIETY 1986</b>	
<b>Lymphocyte-Macrophage Interactions in the Response to Surgical Infections</b> .....	239
Nicolas V. Christou, MD, Montreal; John A. Mannick, MD, Boston; Michael A. West, MD, Minneapolis; Dennis L. Kasper, MD, Boston	
<b>REGULAR DEPARTMENTS</b>	
<b>Correspondence and Brief Communications</b> .....	252
Prevention of Major Amputations in Diabetic Patients Adolf Singer, MD, Elmhurst, NY	
<b>Calendar</b> .....	252
<b>Instructions for Authors</b> .....	137
<b>Index to Advertisers</b> .....	204
