Official Publication of the Western Surgical Association,  
Surgical Infection Society, New England Surgical Society,  
Society of Surgical Oncology**PAPERS READ BEFORE THE 95TH ANNUAL MEETING  
OF THE WESTERN SURGICAL ASSOCIATION,  
DALLAS, NOV 15 TO NOV 18, 1987—PART II**

- Pulmonary Artery Diastolic and Wedge Pressure Relationships in Critically Ill and Injured Patients** ..... 933  
Robert F. Wilson, MD; S. Brent Beckman, MD; James G. Tyburski, MD; Donald J. Scholten, MD, Grand Rapids, Mich  
The pulmonary artery wedge pressure should normally be equal to or slightly lower than the pulmonary artery diastolic pressure.
- Subxiphoid Pericardial Window and Penetrating Cardiac Trauma** ..... 937  
Scot A. Brewster, MD; Richard C. Thirby, MD; William H. Snyder III, MD, Dallas  
This technique quickly identifies or excludes cardiac injuries.
- Assessment of Proximity of a Wound to Major Vascular Structures as an Indication for Arteriography** ..... 942  
John D. S. Reid, MD; John A. Weigelt, MD; Erwin R. Thal, MD; Hugh Francis III, MD, Dallas  
Proved vascular injury in clinically asymptomatic patients with wounds was very low (3.6%).
- Accuracy and Cost of Needle Localization Breast Biopsy** ..... 947  
Lawrence W. Norton, MD; Bernard E. Zeligman, MD; Nathan W. Pearlman, MD, Denver  
The added expense of needle localization breast biopsy with general anesthesia can be justified by a higher success rate.
- Multimodality Treatment of Locally Advanced Breast Carcinoma** ..... 951  
Paul Creighton Hobar, MD, Ronald C. Jones, MD, Dallas; Jeffrey Schouten, MD, Honolulu; A. Marilyn Leitch, MD, Dallas; Fred Hendler, MD, Louisville  
This treatment appears to improve disease-free survival and decreases local recurrence.
- Pheochromocytoma Multisystem Crisis: A Surgical Emergency** ..... 956  
Kenneth A. Newell, MD; Richard A. Prinz, MD; Jack Pickleman, MD; Susan Braithwaite, MD; Marion Brooks, MD; Tom H. Karson, MD; Silas Glisson, PhD, Maywood, Ill  
This highly lethal problem has initial symptoms of high fever, encephalopathy, labile blood pressure, and multiple organ failure.
- Perforated Gastric Ulcers: A Plea for Management by Simple Closure** ..... 960  
William W. Turner, Jr, MD; William M. Thompson, Jr, MD; Erwin R. Thal, MD, Dallas  
Closures of perforated gastric ulcers with omental patches or ulcer excision can be undertaken with low morbidity and mortality.
- Surgical Closure of Atrial Septal Defect in Patients Older Than 50 Years of Age** ..... 965  
Andrew C. Fiore, MD; Keith S. Nauenheim, MD; Kenneth A. Kessler, MD; D. Glenn Pennington, MD; Lawrence R. McBride, MD; Hendrick B. Barner, MD; George C. Kaiser, MD; Vallee Willman, MD, St Louis  
Most older patients with atrial septal defects had disabling symptoms and benefited from closure of the defect with a patch.

The **ARCHIVES OF SURGERY** (ISSN 0004-0010) is published monthly by the American Medical Association, 535 N Dearborn St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610 and at additional mailing office.

**SUBSCRIPTION RATES**—The subscription rates for the Archives of Surgery are as follows: \$40 for one year, \$70 for two years in the United States and US possessions; all other countries, one year, \$52; two years, \$96 (add \$15 surcharge for each one-year subscription, \$30 for two years for air delivery to the United Kingdom, Europe, Bangladesh, India, Nepal, or Sri Lanka). Rates for subscriptions for delivery to Australia, Japan, New Zealand, or South Korea are available through respective agents. **Special rates for residents and medical students in the United States and US possessions are available.** Address inquiries to the American Medical

Association, Circulation and Fulfillment Division, 535 N Dearborn St, Chicago, IL 60610. Phone: (312) 280-7168.

**CHANGE OF ADDRESS**—POSTMASTER, send all address changes to Caryl L. Wertheimer, Director of Fulfillment, 535 N Dearborn St, Chicago, IL 60610. Notification of address change must be made at least six weeks in advance, include both old and new addresses, a recent mailing label, and your new zip code.

**ADVERTISING PRINCIPLES:** Each advertisement in this issue has been reviewed and complies with the principles governing advertising in AMA scientific publications. A copy of these principles is available on request. The appearance of advertising in AMA publications is not an AMA guarantee or endorsement of the product or the claims made for the product by the manufacturer.

## CONTENTS—Continued

|  |                           |
|--|---------------------------|
| <b>Treatment of Anastomotic Leakage Following Low Anterior Colon Resection</b> .....   | 968                       |
| William J. Mileski, MD; Raymond J. Joechl, MD; Robert V. Rege, MD; David L. Nahrwold, MD, Chicago  |                           |
| Takedown of the anastomosis, end colostomy, and closure of the rectum is most efficacious for low anterior anastomotic leaks.  |                           |
| <b>ORIGINAL ARTICLES</b>   |                           |
| <b>Clinicopathologic Analysis of Carcinoma of the Breast in an African Population</b> .....  | 972                       |
| J. F. Ngala Kenda, MD, PhD; B. Chirimwami, MD, PhD; T. Veyi, MD, Kinshasa, Zaïre   |                           |
| Cancer of the breast in an African population occurs at a younger age and is associated with multiparity and breast-feeding.   |                           |
| <b>Duodenal Closure and Esophagojejunostomy Experience With Mechanical Stapling Devices in Total Gastrectomy for Cancer</b> .....  | 979                       |
| Jean-Pierre Campion, MD; Janis Nomikos, MD; Bernard Launois, MD, Rennes, France  |                           |
| Stapled anastomoses, compared with sewn esophagojejunostomies, were associated with decreased mortality.   |                           |
| Invited Editorial Comment by Felicien M. Steichen, MD, New York  |                           |
| <b>Choledochal Cysts: Oligoganglionosis in the Narrow Portion of the Choledochus</b> .....   | 984                       |
| Masato Kusunoki, MD, Nishinomiya, Japan; Naoaki Saitoh, MD, Kobe, Japan; Takehira Yamamura, MD; Shinsuke Fujita, MD; Toku Takahashi, MD; Joji Utsunomiya, MD, Nishinomiya, Japan |                           |
| Decreased numbers of ganglion cells were identified in the distal, narrow common duct in patients with choledochal cysts.  |                           |
| <b>Should Portosystemic Shunt Be Reconsidered in the Treatment of Intractable Ascites in Cirrhosis?</b> .....  | 987                       |
| Dominique Franco, MD; Corinne Vons, MD; Oscar Traynor, MCh, FRCSI; Claude de Smaija, MD, Villejuif, France   |                           |
| Portosystemic shunts effectively dealt with ascites but produced a high rate of encephalopathy.  |                           |
| <b>REVIEW</b>  |                           |
| <b>Current Concepts of Protein Turnover and Amino Acid Transport in Liver and Skeletal Muscle During Sepsis</b> .....  | 992                       |
| Per-Olof Hasselgren, MD, PhD; Peter Pedersen, MD; Harry C. Sax, MD; Brad W. Warner, MD; Josef E. Fischer, MD, Cincinnati   |                           |
| Interaction between different types of mediators may be necessary for the host responses to severe injury and sepsis.  |                           |
| <b>CLINICAL NOTES</b>  |                           |
| <b>Intrapancreatic Communication of Bile and Pancreatic Ducts Secondary to Pancreatic Necrosis</b> .....   | 1000                      |
| Bonnie M. Miller, MD; L. William Traverso, MD; Patrick C. Freeny, MD, Seattle  |                           |
| A cavity in the head of the pancreas communicated with the bile duct, pancreatic duct, and duodenum.   |                           |
| <b>Multiple Aneurysms in Behçet's Disease</b> .....  | 1004                      |
| Stephen T. Bartlett, MD; Walter J. McCarthy III, MD; Arthur S. Palmer, MD; William R. Flinn, MD; John H. Bergan, MD; James S. T. Yao, MD, PhD, Chicago                           |                           |
| Multiple aneurysms occurred in young adults with this chronic multisystem disease.   |                           |
| <b>Catheterization and Angioplasty of the Nonopacified Peripheral Autogenous Vein Bypass Graft</b> .....   | 1009                      |
| Seymour Sprayregen, MD; Frank J. Veith, MD; Curtis W. Bakal, MD, Bronx, NY   |                           |
| Nonopacified but nonthrombosed vein grafts had flow restored by transluminal angioplasty.  |                           |
| <b>Extrahepatic Tumor Deposits Misdiagnosed as Intrahepatic Metastases</b> .....   | 1013                      |
| Kevin S. Hughes, MD, Sacramento, Calif; Donald L. Miller, MD, Ronald Neuman, MD, Bethesda, Md; Paul H. Sugarbaker, MD, Atlanta   |                           |
| Radiographic characteristics are described that will help differentiate intrahepatic and extrahepatic metastases.  |                           |
| <b>Treatment of Instrumental Perforation of Esophageal Malignancy by Transhiatal Esophagectomy</b> .....   | 1016                      |
| Charles J. Yeo, MD; Keith D. Lillemoe, MD; Andrew S. Klein, MD; Michael J. Zinner, MD, Baltimore   |                           |
| Four patients were treated successfully by this technique.   |                           |
| <b>BRIEF CLINICAL NOTES</b>  |                           |
| <b>Angiodysplasia in Transposed Colon</b> .....  | 1019                      |
| V. K. Mittal, MD, MS; P. S. Khanuja, MD; Y. N. Amaria, MD, MS, FRCS(Engl), FRCS(Ed); S. S. Hans, MD, FRCS(C), Detroit  |                           |
| Upper gastrointestinal tract bleeding occurred from an angiodysplastic lesion in a colon interposition.  |                           |
| <b>Right Trisegmentectomy With A Synthetic Vena Cava Graft</b> .....   | 1021                      |
| Shunzaburo Iwatsuki, MD; Satoru Todo, MD; Thomas E. Starzl, MD, PhD, Pittsburgh  |                           |
| A Dacron graft was used to replace the vena cava from the renal veins to the diaphragm.  |                           |
| <b>REGULAR DEPARTMENTS</b>   |                           |
| <b>Correspondence and Brief Communications</b> .....   | 1023                      |
| <b>Books</b> .....   | 1025                      |
| <b>Calendar</b> .....  | 1027                      |
| <b>Instructions for Authors</b> .....  | See May 1988 Issue, p 536 |
| <b>Index to Advertisers</b> .....  | 918                       |
| <b>CORRECTIONS</b>   |                           |
| <b>Safe Management of the Impossible Duodenum: Risk Avoidance in Surgery of Peptic Ulcer</b> .....   | 964                       |
| Grant V. Rodkey, MD, Boston  |                           |
