## COMMENTARY

- Laparoscopic Cholecystectomy: Threat or Opportunity?** ..... 1245  
 Ronald K. Tompkins, MD, Los Angeles, Calif

## SPECIAL ARTICLES

- Procedures and Staff Support for the Surgery Residency Review Committee** ..... 1246  
 John T. Boberg, PhD, Chicago, Ill
- Forty Years of the RRC in Surgery** ..... 1251  
 Claude H. Organ, Jr, MD, Oakland, Calif

**PAPERS READ BEFORE THE 61ST ANNUAL MEETING OF THE PACIFIC COAST SURGICAL ASSOCIATION, LAGUNA NIGUEL, CALIF, FEBRUARY 18 TO FEBRUARY 21, 1990**

- Humanism and the Profession of Surgery in the Era of Medical Perestroika** ..... 1252  
 Eric W. Fonkalsrud, MD, Los Angeles, Calif

- Is Arterial Proximity a Valid Indication for Arteriography in Penetrating Extremity Trauma?: A Prospective Analysis** ..... 1256

Fred A. Weaver, MD; Albert E. Yellin, MD; Madeline Bauer, PhD; Jon Oberg, MD; Navid Ghalambor; Richard P. Emmanuel; Robert M. Applebaum, MD; Michael J. Pentecost, MD; Robert M. Shorr, MD, Los Angeles, Calif

- Arteriography to screen for arterial injuries when proximity alone is the indication rarely identifies a significant injury and should be abandoned.

- Is Liver Transplantation Justified for the Treatment of Hepatic Malignancies?** ..... 1261

Kim M. Olthoff, MD; J. Michael Millis, MD; Michael H. Rosove, MD; Leonard I. Goldstein, MD; Kenneth P. Ramming, MD; Ronald W. Busuttill, MD, PhD, Los Angeles, Calif

- Orthotopic liver transplantation can provide long-term care and palliation for malignant disease; patient selection is important.

**Invited Commentary: Byers W. Shaw, Jr, MD, Omaha, Neb**

- Comprehensive Management of Acute Necrotizing Pancreatitis and Pancreatic Abscess** ..... 1269

Russell Stanten, MD, Charles F. Frey, MD, Sacramento, Calif

- Reduced mortality rates in patients with necrotizing pancreatitis and abscess are possible with a comprehensive management plan.

- Comprehensive Management of Renal Failure in Infants** ..... 1276

David Tapper, MD; Sandra Watkins, MD; Mark Burns, MD; Robert O. Hickman, MD; Ellis Avner, MD, Seattle, Wash

- Modification of conventional peritoneal dialysis has avoided bowel perforations and enabled successful dialysis in the smallest infants.

- Extracorporeal Membrane Oxygenation in the Treatment of Neonatal Respiratory Failure** ..... 1286

Robert P. Foglia, MD; H. Scott Bjerke, MD; Robert E. Kelly, Jr, MD; J. Duncan Phillips, MD; Eric W. Fonkalsrud, MD, Los Angeles, Calif

- Extracorporeal membrane oxygenation allows for resolution of pulmonary hypertension with an improved survival and is associated with a low incidence of chronic lung disease.

- The Impact of Microinvasion on Axillary Node Metastases and Survival in Patients With Intraductal Breast Cancer** ..... 1298

Jan H. Wong, MD; Kelly H. Kopald, MD; Donald L. Morton, MD, Sepulveda, Calif

- Intraductal breast cancer with microinvasion appears to carry an extremely good prognosis with minimal risk of nodal metastases.

- Immediate Breast Reconstruction Following Mastectomy Is as Safe as Mastectomy Alone** ..... 1303

Adele L. Vinton, MD; L. William Traverso, MD; R. David Zehring, MD, Seattle, Wash

- Modified radical mastectomy (MRM) with immediate breast reconstruction is as safe as MRM alone with respect to wound complications.

The ARCHIVES OF SURGERY (ISSN 0004-0010) is published monthly by the American Medical Association, 515 N State St, Chicago, IL 60610, and is an official publication of the Association. Second-class postage paid at Chicago, IL 60610, and at additional mailing office.

**SUBSCRIPTION RATES**—The subscription rates for the ARCHIVES OF SURGERY are as follows: \$56 for one year, \$97 for two years in the United States and US possessions; all other countries, one year, \$66; two years, \$117 for surface delivery. For expedited air delivery to most countries, add \$15 surcharge for one year subscription, \$30 for two years. (Rates for subscriptions for delivery to Japan or South Korea are available through exclusive agents—contact the publisher.) **Special rates for residents and medical students in the United States and US possessions are available.** Address inquiries to the American Medical Association, Circulation

and Fulfillment Division, 515 N State St, Chicago, IL 60610. Phone: (312)464-0183.

**CHANGE OF ADDRESS**—POSTMASTER, send all address changes to the ARCHIVES OF SURGERY, Attention: Subscription Department, 515 N State St, Chicago, IL 60610. Notification of address change must be made at least six weeks in advance, include both old and new addresses, a recent mailing label, and your new zip code.

**Advertising Principles:** Each advertisement in this issue has been reviewed and complies with the principles governing advertising in AMA scientific publications. A copy of these principles is available on request. The appearance of advertising in AMA publications is not an AMA guarantee or endorsement of the product or the claims made for the product by the manufacturer.

**CONTENTS—Continued**

<b>Analysis of Potential Risks Associated With 7.5% Sodium Chloride Resuscitation of Traumatic Shock</b> . . . . .	<b>1309</b>
Mary J. Vassar, RN, MS; Colleen A. Perry, RN; James W. Holcroft, MD, Sacramento, Calif	
● In a setting of limited volume resuscitation, the use of hypertonic saline may have a favorable risk-to-benefit ratio.	
<b>Blunt Intestinal Injury: Keys to Diagnosis and Management</b> . . . . .	<b>1319</b>
David H. Wisner, MD; Yong Chun; F. William Blaisdell, MD, Sacramento, Calif	
● In blunt intestinal injury, peritoneal lavage should be used when tenderness cannot be evaluated; timely intervention minimizes morbidity.	
<b>The Operative Management of Coexisting Thyroid and Parathyroid Disease</b> . . . . .	<b>1327</b>
Seth D. Strichartz, MD, Armando E. Giuliano, MD, Los Angeles, Calif	
● The simultaneous treatment of primary hyperparathyroidism and the nodular goiter with a single operation is safe, avoids expense and the risks of neck reexploration.	
<b>The Efficacy of Central Venous and Pulmonary Artery Catheters and Therapy Based Upon Them in Reducing Mortality and Morbidity</b> . . . . .	<b>1332</b>
William C. Shoemaker, MD; Harry B. Kram, MD; Paul L. Appel, MPA; Arthur W. Fleming, MD, Los Angeles, Calif	
● There are significant reductions in morbidity and mortality in critically ill patients using supranormal cardiac indexes (CI), oxygen delivery ( $\dot{D}O_2$ ), and oxygen consumption ( $\dot{V}O_2$ ).	
<b>Popliteal Vascular Trauma: A Community Experience</b> . . . . .	<b>1339</b>
James J. Peck, MD; A. Brent Eastman, MD; John J. Bergan, MD; Marc M. Sedwitz, MD; David B. Hoyt, MD; Donley G. McReynolds, MD, San Diego, Calif	
● An aggressive multidisciplinary approach with early reconstructive management can achieve a functional extremity in popliteal vascular trauma.	
<b>Utility of Computed Tomography for Surveillance of Small Abdominal Aortic Aneurysms: Preliminary Report</b> . . . . .	<b>1345</b>
William C. Krupski, MD; Arie Bass, MD; Dennis W. Thurston, MD; Ralph B. Dille, MD; Eugene F. Bernstein, MD, PhD, La Jolla, Calif	
● CT follow-up scans of small abdominal aortic aneurysms may provide valuable information regarding their future expansion.	
<b>Treatment of Traumatic Rupture of the Thoracic Aorta: A 15-Year Experience</b> . . . . .	<b>1351</b>
A. Craig Eddy, MD; Valerie W. Rusch, MD; Thomas Marchioro, MD; David Ashbaugh, MD; Edward D. Verrier, MD; David Dillard, MD, Seattle, Wash	
● The aortic cross-clamp time should be limited to less than 30 minutes with thoracic aortic rupture to minimize major complications.	
<b>Angioscopy for Intraoperative Management of Thromboembolism</b> . . . . .	<b>1357</b>
Jacob Segalowitz, MD; Warren S. Grundfest, MD; Richard L. Treiman, MD; Willis H. Wagner, MD; Robert M. Carroll, MD; Robert F. Foran, MD; Phillip M. Levin, MD; J. Louis Cohen, MD; David V. Cossman, MD; Wayne Gradman, MD; Auri Spigelman, MD; Ernest Shore, MD, Los Angeles, Calif	
● Angioscopy is a useful adjunct during thromboembolism.	
<b>Massive Splenomegaly: Superior Results With a Combined Endovascular and Operative Approach</b> . . . . .	<b>1363</b>
Jonathan R. Hiatt, MD; Antoinette S. Gomes, MD; Herbert I. Machleder, MD, Los Angeles, Calif	
● Preoperative embolization alters the operative mortality associated with splenectomy for massive splenomegaly.	
<b>The Recalcitrant Perineal Wound After Rectal Extirpation: Applications of Muscle Flap Closure</b> . . . . .	<b>1371</b>
James P. Anthony, MD, Stephen J. Mathes, MD, San Francisco, Calif	
● Muscle flaps are an effective single-stage procedure for closing the chronic perineal wound.	
<b>Fibrin Glue Inhibits Intra-abdominal Adhesion Formation</b> . . . . .	<b>1378</b>
Christian de Virgilio, MD; Terry Dubrow, MD; Barry B. Sheppard, MD; William D. MacDonald, MD; Ronald J. Nelson, MD; Malcolm A. Lesavoy, MD; John M. Robertson, MD, Torrance, Calif	
● The inhibitory effect of fibrin glue on intra-abdominal adhesion formation in rats is dependent on the fibrin glue fibrinogen concentration.	
<b>Selection Factors Resulting in Improved Survival After Surgical Resection of Tumors Metastatic to the Lungs</b> . . . . .	<b>1387</b>
Francesco M. Marincola, MD, James B. D. Mark, MD, Stanford, Calif	
● Pulmonary metastectomy from melanoma and breast cancer should be accomplished after other metastatic sites have been stringently ruled out.	
<b>Heterotopic Tissue in Lymph Nodes: An Unrecognized Problem</b> . . . . .	<b>1394</b>
Mark P. Sawicki, MD; Thomas J. Howard, MD; Edward Passaro, Jr, MD, Los Angeles, Calif	
● Heterotopic tissue in lymph nodes may be confused with metastatic disease.	
<b>Reoperative Surgery for the Morbidly Obese: A University Experience</b> . . . . .	<b>1400</b>
Joe A. Cates, MD; Ernst J. Drenick, MD; Mohammed Z. Abedin, PhD; Jeff E. Doty, MD; Kimberly D. Saunders, MD; Joel J. Roslyn, MD, Los Angeles, Calif	
● Revisational operations (MK) for failed bariatric surgical procedures warrant careful consideration; the potential for major complications and death should be considered against the proposed benefits.
